

CleanPath™ Adhesive Mats

CleanPath™ Adhesive Mats are the number one choice in cleanroom mats. Place CleanPath™ Adhesive Mats in cleanroom entry areas and change room entry areas to significantly decrease the transfer of foot-borne and wheel-borne contaminants including viable and non-viable particles. Whether trying to prohibit contamination in critical environments or general production areas, CleanPath™ Adhesive Mats are the number one choice in cleanroom mat options.

Key Attributes

- Mat composition: LDPE (Low Density Polyethylene)
- Non transferring adhesive
- Thickness per sheet: 40 Micron
- Top protective layer
- Bottom backing sheet
- Color of tacky mats: Blue
- Layers are numbered for easy tracking of remaining sheets
- Perfect for cleanrooms. Laboratories and other dust/dirt free environment
- Adhesive contains no solvents such as toluene
- No out-gassing or irritation when peeling of each layer of the mat – odorless

Benefits

- Excellent adhesive strength and cleanliness
- Blue color allows differentiation for guarding against migration into critical areas
- Blue color aids in the visual observation of tracked contamination
- Economical
- Adhesive coated surface film peels off easily for disposal

Applications

- Designed for use in ISO Class 3 and higher cleanroom environments
- General production areas
- Cleanroom entry's and air locks

Storage

- Lay flat and **DO NOT** bend or place on uneven floor. Keep away from heat, flames, chemicals, and solvents.
